Rob

Front-end Engineer & Tech Lead

Gaeta, Italy roberto.prats00@gmail.com itsrob.dev linkedin.com/in/robertoprats github.com/itsrob00

SUMMARY

I build front ends for large platforms in React and TypeScript, and make sure they're well tested.

EXPERIENCE

Front-end Engineer • Exolab Srl — Jan 2026 — now

Lead the front end of PCO, a time and activity reporting platform for national and regional public facilities, built with Sogei after taking it over from IBM. Set the architecture for a team of 3 front-end developers, own front-end QA and sign off every front-end release. Introduced unit testing and grew the suite to 1,000+ tests at 85%+ coverage.

Front-end Consultant • Exolab Srl, client Sisal via Reply — Jan — Dec 2025

Migrated Athena, the shell that hosts Sisal's online games, from React 15 to React 19 and from Webpack to Vite, shipping 3 months ahead of the deadline. Then designed and built, solo, the component library for Sisal's new VLT admin console, which is replacing the old Visual Basic application.

Web Developer • Exolab Srl — Jan 2023 — Dec 2024

Built front-end features for GestCert and EMCS, two production systems of the Italian Customs and Monopolies Agency (ADM), for Sogei, in a 9—12 person team.

PROJECTS

devflow • Creator & maintainer — Oct 2026 — now

A Claude Code plugin that plans, builds, checks and proves each task, step by step.

Claude Code • Node.js • JavaScript • github.com/itsrob00/devflow

STACK

React • TypeScript • Redux Toolkit • Tailwind CSS • Vite • Vitest • Playwright • Claude Code

LANGUAGES

English (Native or bilingual) • Italian (Native or bilingual)

EDUCATION

Technical diploma, Transport and Logistics • Istituto Tecnico Nautico “G. Caboto”, Gaeta — 2014 — 2019
